# Policy Priorities

- Auto and technology companies are making rapid autonomous vehicle (AV) development, but the regulatory framework has slowed their ability to technology.
- Ford is working hard to launch our fully autonomous commercial use.
- Now is the time for legislators to set the right policies a leader in innovation and the development of the

# A Collaborative Solution

- Ford is working with federal, state and local state federal legislation that:
  - Provides clear responsibilities for federal and state sets vehicle performance standards and states retail with respect to licensing, registration, insurance, an
  - Expands authority for NHTSA to permit safe deployment are being developed.
  - Requires a rulemaking to update federal safety standards vehicles.
- Thank you to the Michigan Legislature and administrative barriers to testing and deployment in Michigan.
